Ambulatory Care Conference

Advancing Ambulatory Care Practice through Education

In March 2014, ASHP launched the *sold out*, inaugural Ambulatory Care Conference. In 2015 this popular new conference will now be offered as part of the Summer Meetings!

AC² is designed for practitioners who want to advance ambulatory care practice and provides education on hot topics and emerging issues in the practice of Ambulatory Care pharmacy. Our goal is to create a vision for forward thinking pharmacy practice models that will ensure pharmacists are members of the ambulatory healthcare team who are responsible and accountable for patient and healthcare system outcomes.

AC² professionals will gain unique insight on the following topics relevant to an ever evolving pharmacy landscape:

- Outcomes
- Operations/Billing Management
- Transitions of Care
- Clinical Controversies and Competencies

What's next for ambulatory care pharmacy models? How do we develop and train the next generation of practitioners and what impact do outcomes have on your services? These questions and more will be answered as you participate in education and networking events with clinicians across all pharmacy settings.
