

Welcome to the **Medication Safety Collaborative!** After continued success and *more than tripling* our collaborating support last year, we are excited to once again join together interprofessional teams of health-system based clinicians and administrators who focus on quality and patient safety.

Participants will not only leave with CE in their field (CME, CPE, Nursing CE); but will work collaboratively to *envision* a safer health-care system; and *engage* with their peers to discover solutions. Most importantly, they will leave with key takeaways they can then *execute* into their practice.

2015 Educational Programming Hot Topics include:

- Top Safety Issues
- Standardizing for Safety (IVs/Pumps)
- Scalable solutions to improve quality
- From Data to Action
- Strategies Worth Sharing (real-life examples of solutions)

Join your fellow patient safety colleagues for 4 days of interactive learning that you can *immediately incorporate* and *implement* into your practice.

Who Attends?

- Front-line staff
- Physicians
- Quality Professionals
- Patient Safety Officers
- Nurses
- Risk Managers
- Pharmacists
- Med Safety Officers
- Administrators
