

Using Continuing Professional Development (CPD) at ASHP Summer Meetings

You are attending the ASHP Summer Meetings for many reasons, not the least of which is to earn valuable CE credits required for licensure! However, continuing Professional Development is a framework to help you to design and implement an education plan to go **beyond** meeting your licensing requirements to facilitate your professional development and competency as a healthcare provider.

- **Reflect:** List your current challenges and opportunities for improvement in practice. Do you need additional education to tackle some of these?
- **Plan:** Circle in your program or write in the space below those sessions that may meet learning needs from your reflecting.
- **Act:** Get to as many of these educational sessions as you can. If you can't get to them all, you will have access to the content after the meeting.
- **Evaluate:** This is for after the meeting, when you're in your practice setting. Was there an impact? What else do you need to do?
- **Record & Review:** That's the purpose of this page. Documenting your progress is ongoing and essential.
